1. The following is an examiner's statement of reasons for allowance:

Claims 1-7, 9-13, 15, 17 are allowed over prior art.

Claims 8, 14, 16 are canceled.

The prior art fails to teach and render obvious the features as claimed in independent claims for a traffic measurement system and method;

In claim 1:

“a third traffic type whose applications are identified by extracting application data from the second traffic type, since application data is not included in reverse traffic of the second traffic type;

a forth traffic type whose applications are assigned predetermined port numbers are identified based on application signature of other flows since the port numbers are exchanged through an other control flow; and

a fifth traffic type whose applications are not classified into the first through the fourth traffic types. “

In claim 9:

“classifying a fourth traffic type whose applications are identified by analyzing the flow data remaining after the third traffic type is classified

and flow data measured at different points, since port numbers for the applications are not predetermined;

classifying a fifth traffic type whose applications cannot be identified using the flow data remaining after the fourth traffic type is classified; and taking statistics on traffic classified into the fifth traffic type in order to monitor the applications and storing the statistics result, after classifying the fifth traffic type. "

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
